## Guidelines for Prevention of New Coronavirus

Due to the recent Novel corona virus outbreak, most private hospitals and healthcare facilities had issued a new policy that all patients who have fever or respiratory symptoms should reschedule their appointment and operation dates.

BNS Medical Imaging Limited will also follow such policy and we would recommend our patients to follow the same to prevent the spread of the virus.

1. Please let us know if you had travelled abroad in the past two weeks, so we can have a record. Also if you have any respiratory symptoms (e.g. *Cough, dry cough, Runny nose, Sore throat, Fever, Muscular pain, Headche*), please inform us ahead so we can rearrange the appointment for you.
2. We will check temperature for all patients and their accompanying persons.
3. Please wear a face mask all the time.
4. To Avoid overcrowding within the clinic, only 1 accompanying person can stay with the patient.

We are sorry for the inconvenience caused.

Please contact our staff or email us [staff@bnsimaging.com](mailto:staff@bnsimaging.com) if you have any queries.
